

Hawai'i State Elementary STEM Expo 2022

Dear SJPS 'Ohana,

It is with great pleasure that we announce our participation in the very first virtual Hawaii State Elementary STEM Expo 2022, offered by the Hawai'i Academy of Science (HAS). The Hawai'i Academy of Science has offered to showcase science projects submitted by elementary schools from both public and private schools in grades K-5. We are proud to share that we have a total of 60 students representing SJPS, from grades 1-5!

This is a wonderful opportunity to inspire, cultivate, and encourage our up-and-coming scientists to continue to explore the various fields of science and offer them a chance to teach us all something. The link below will lead you to the virtual expo. Please feel free to view and comment on each student's presentation. Each student has made us proud, and we can't wait to see all of the beautiful things ahead! Thank you to our SJPS families for being your child's primary educator and helping them to go above and beyond! May God's choicest blessings be upon you all!

Blessings,

Ms. Kaha'e Maika'i-lakopo

SJPS Science Fair Coordinator
