

STAYING **SAFE** TOGETHER

DURING THE HOLIDAYS

By Noah Tapeç and Adam Armas

AVOID LARGE GATHERINGS

We can stay safe by avoiding large crowds. If we were to attend large gatherings such as concerts or parties, there would be a high chance of someone getting sick and obtaining the virus. Instead, you can participate in these events virtually. You can also avoid traveling out of the state or to any hotels, resorts, etc.

WEAR A MASK

You can also stay safe by wearing a mask. Although it is not fully protective, guarantee it will keep you safe. You should always wear a mask wherever you go, especially in public areas. Not only will wearing a mask protect you, but it will also protect those around you.

FOLLOW RULES & GUIDELINES

Lastly, follow the all the rules given. Practice social distancing, sanitizing your hands, and avoiding touching your face will all help keep you safe. Especially during the holidays, be sure to get tested for corona and/or the flu. If necessary, quarantine yourself and always be mindful of your safety and the safety of others.

Social distancing

SPREAD THE MESSAGE

Even in this dreadful time, we encourage you to stay hopeful and to look on the bright side. During the upcoming holidays, we are called to be thankful and generous. If we work together to keep safe, we can overcome this virus and have a safe and wonderful holiday.
